

Last step to the treasure

S

When you walked into the bar, a girl with an eye patch waves at you.

"The mighty Piraku fleet has hidden a treasure of great value and I found a treasure map!" she whispers in your ear. "But - the Piraku's are very clever. To make sure only real Piraku's can find the treasure, they created a special 'Piraku' treasure map. When I talked to one of them when they were a bit tipsy, they told me: 'You just need to add the digits in red circles together - easy as that!'. Can you find the treasure?"

She hands you an old treasure map, but something is off about it. On the back of the map you find a post-it with a cryptic text:

"Normal sudoku rules apply. Every row, column and box contains the digits 1-9 once each. Cells grouped with a dotted outline (cage) sum to the number in the top left corner and contain no duplicate digits. Cells separated by a 'V' sum to 5 and cells separated by an 'X' sum to 10. Not all Vs and Xs are necessarily given."

"But - " you gasp, "The treasure map is all wet! How do I write on it?" you ask. "Piraku's are not stupid. They too have access to modern technology.". She takes your hand and scribbles something on the back of it with a pencil. "Use this, and..." she stops for a moment before she adds "... and good luck." before she swiftly left the bar. You feel a bit dizzy. A pirate treasure?! Here..? You look at your hand to find:
